

# INTELLIGENT TRANSFORMATION

**WHITEPAPER**

[www.aitrantoken.com](http://www.aitrantoken.com)

# About the Project

Intelligent Transformation (AITRAN) is an AI-based trading platform created to eliminate users from buying indecision and automate their trading through an automated trading system.

Intelligent Transformation (AITRAN) platform also complies with BEP-20 standards. Our goal is to create trading robots for financial institutions and provide cybersecurity services to large corporations on a global scale.

## 1- INTRODUCTION

Intelligent Transformation is a project that seeks to unify cryptocurrencies and stimulate the market with an advanced smart trading system.

Thanks to the project's intelligent trading system, it analyzes comprehensive data and creates a system that works on your behalf to make the most accurate pricing of other digital assets in the market.

Intelligent Transformation is a project that will surpass all its competitors with its user experience, automated processing capability, predictive feature and high-level security.

## 2- MARKET ANALYSIS

Intelligent Transformation, brings together a wide range of financial data, including historical price data, trading data volumes, market trends and social sentiment. It forms the basis for the development of sophisticated forecasting algorithms.

### 3- ALGORITHMS

The Intelligent Transformation algorithm uses state-of-the-art machine learning models such as deep neural networks, recurrent neural networks and ensemble learning techniques to analyze and predict the future prices of digital assets.

- **Moving Averages ( MA ):**

The ma indicator smooths out price fluctuations and provides insight into the overall trend direction.

- **Relative Strength Index ( RSI ):**

RSI measures the speed and change of price movements, indicating overbought or oversold conditions.

- **Bollinger Bands:**

Bollinger bands consist of a moving average and upper and lower bands that represent price volatility

- **Moving Average Convergence Divergence ( MACD ):**

MACD is a trend-following momentum indicator that identifies potential trend reversals.

- **Fibonacci Retracement:**

This tool uses horizontal lines to indicate potential levels of support and resistance based on the fibonacci sequence.

- **Volume Profile:**

Volume profile displays the trading volume at different price levels, highlighting areas of high liquidity and potential turning points.

- **Ichimoku Cloud:**

The ichimoku cloud combines multiple indicators to provide a comprehensive view of support, resistance and trend strength.

These technical indicators along with other proprietary metrics and patterns, contribute to the accuracy and reliability of the Intelligent Transformation prediction algorithms.

## **4- ACCURACY AND PERFORMANCE EVALUATION**

By subjecting predictive algorithms to backtesting and validation processes their reliability and accuracy. Performance measures, including accuracy, risk-adjusted returns and other relevant indicators are used to evaluate and optimize the performance of the algorithms. By leveraging technical indicators and using advanced machine learning models, AiTran Token provides users with valuable insights into future market behavior, ensure informed investment decisions are made and potentially maximize investment returns.

## **5- AUTOMATED TRADING SYSTEM**

### **5-1 EXECUTION AND ORDER MANAGEMENT:**

Intelligent Transformation's auto trading system seamlessly executes buy and sell orders based on the predictions generated by the ai algorithms. The system integrates with leading crypto currency exchanges, ensuring efficient order execution, portfolio management and risk mitigation. Strict risk management protocols are implemented to safeguard client investments and optimize trading outcomes

### **5-2 SECURITY MEASURES:**

Intelligent Transformation ai prioritizes the security of its platform and user assets. Industry standard encryption protocols and secure communication and robust identity verification processes are implemented to ensure the integrity of user accounts regular security audits and penetration testing are conducted to address vulnerabilities promptly.

## **6- AITRAN TOKEN ECONOMY**

### **6-1 TOKEN OVERVIEW:**

**AiTran Token is a core part of the Intelligent Transformation ecosystem. Bep-20 standard on the binance smartchain. it functions as an autility token and allows users to you can access exclusive features, receive fee refunds and unlock additional benefits on the platform. The aitrان token serves as a medium of exchange that incentivizes user participation, incentive fragmentation and supportive networking effects**

### **6-2 TOKEN USAGE AND BENEFITS:**

**AiTran Token shareholders, reduced trading fees, improved access to advanced market analysis tools, priority access to new features and products, and active participation in community governance. users with higher token ownership and engagement levels receive additional discounts, establishing a mutually beneficial relationship**

### **6-3 TOKEN DISTRIBUTION AND ECONOMICS:**

**A new industry distribution following a well-defined and attractive token economy fair distribution and encouraging active participation within the traditional ecosystem.**

### **6-4 TEAM ALLOCATION:**

**To recognize the dedicated efforts of the AiTran Token team, to encourage their continued work and to commit to the success of the project, 10% of the total token supply will be allocated to the team.**

# ROADMAP

## Q3 2023 :

During this phase, the app concept, closed beta testing, AiTran Token team, develop the app concept, create an intuitive user interface and Rigorous closed beta testing will be conducted to improve the functionality and user experience of the platform.

## Q4 2023 :

Market testing and feedback will be collected by opening the platform to a limited number of users. With the feedback received, system adjustments will be made and necessary improvements will be completed and performance and additional security measures will be implemented.

## Q2 2024 :

Integrations with cryptocurrencies will be completed and work will be completed to ensure uninterrupted connectivity by prioritizing exchanges and regular liquidity will be provided for the platform.

## Q4 2024 :

The entire platform will be publicly launched and officially go live. The first users to join the system will receive exclusive access and discounts.

## Q1 2025 :

In the final phase, we will introduce a centralized wallet that provides AiTran users with a high level of security and complete control. In addition, we will provide users with out-of-system solutions that will allow them to use different payment methods.

# TOKENOMIC

**TOTAL SUPPLY: 33.000.000.000**

10% Airdrop  
( 3.300.000.000 )

20% Listing  
( 6.600.000.000 )

15% Development  
( 4.950.000.000 )

10% Team  
( 3.300.000.000 )

10% Liquidity  
( 3.300.000.000 )

35% Marketing  
( 11.550.000.000 )
